

TUFAIL KHAN

Full-Stack Developer (learning) | Cloud & DevOps Intern

Pune, India | tufelkhandz@gmail.com | +91 8007744354 | github.com/tufailkhan | linkedin.com/in/tufailkhan

PROFESSIONAL SUMMARY

Computer Science student (2026 batch) with hands-on experience in full-stack development and cloud technologies. Proficient in Java, Python, React.js, and Node.js, with practical exposure through a Cloud & DevOps internship at DrCloud Pvt. Ltd. Developed UniKart, a real-world e-commerce platform presented at the ICSICE-2026 international conference (Scopus/Wiley). Certified in Cloud Computing (NPTEL – IIT Kanpur, Elite 82%) and AWS Cloud Practitioner. Strong foundation in building scalable applications, problem-solving, and delivering end-to-end software solutions.

EDUCATION

B.Tech – Computer Science Engineering

Ajeenkya DY Patil University, Pune | 2022 – Present

7.81 CGPA (up to 7th Sem)

Higher Secondary Education (PCMB)

Pune, India | 2019 – 2021

90.83%

WORK EXPERIENCE

DrCloud Pvt. Ltd. | Cloud & DevOps Intern

January 2026 – Present | Remote

- Deployed and maintained scalable cloud infrastructure on AWS EC2 using Terraform, eliminating manual provisioning and standardising environment setup across the team.
- Automated 3+ infrastructure deployment workflows, reducing manual release effort and improving deployment consistency for production environments.
- Built full-stack features using React.js and Node.js — including UI components and REST API integrations — that shipped to live users of the DrCloud platform.
- Monitored system performance and availability via AWS CloudWatch; identified and escalated reliability bottlenecks, contributing to measurable uptime improvements.
- Received formal Appreciation Letter from DrCloud management for contributions to cloud automation, full-stack development, and cross-functional delivery.

Concentrix Limited | Associate – Customer Service & Sales

June 2022 – March 2024 | Pune, India

- Utilised Salesforce CRM to manage customer data, track interactions, and generate performance reports — building hands-on data documentation and reporting skills.
- Collaborated with cross-functional teams (sales, support, operations) to resolve escalated issues within defined SLAs, demonstrating structured problem solving under pressure.
- Created process documentation and onboarding training guides adopted across the team, demonstrating clarity of communication and attention to detail.

TECHNICAL SKILLS

Languages & Frameworks	Java (Basic), Python (Basic), JavaScript, React.js, Node.js, Flask, HTML, CSS, JDBC
Cloud & DevOps	AWS EC2, IAM, CloudWatch, VPC (Conceptual), Terraform (Basic), Git, GitHub
Data & Tools	Python (Pandas, NumPy, Matplotlib), SQL / MySQL, MongoDB, Power BI, Tableau, Excel, Salesforce CRM
Other	Agile / Scrum, Figma (Wireframing), Jupyter Notebook, VS Code

CLOUD CONCEPTS & ARCHITECTURE

AWS Cloud Infrastructure

- Explored EC2 instance setup, security groups, IAM roles, and CloudWatch monitoring
- Documented deployment workflows and best practices for secure cloud hosting

VPC Network Architecture

- Designed a Virtual Private Cloud (VPC) with public/private subnets
- Analysed networking components including route tables, Internet Gateway, NAT Gateway, and access control mechanisms

PROJECTS

UniKart – Campus Utility Platform | [React, JavaScript, CSS](#) | [Published – ICSICE-2026, Scopus / Wiley](#)

Built a campus e-commerce platform with a fully responsive React frontend — including product and event listings, cart system, vendor dashboard, and role-based UI for students and vendors. Integrated with backend REST APIs. Research paper "Design and Implementation of UniKart: A College E-Commerce Website" presented at ICSICE-2026 and published in Scopus/Wiley conference proceedings. Cert. No: ICSEC2618234.

Hotel Management System | [Java Swing / AWT / JDBC](#)

Designed and built a full-stack hotel operations system with Admin Dashboard (room and staff management, dynamic pricing) and Reception Dashboard (real-time bookings, billing). Applied OOP principles — encapsulation, inheritance, and polymorphism — across the class architecture, with MySQL persistence via JDBC.

Hospital Management System | [Python Flask, MySQL](#) | [Group Project](#)

Built REST API endpoints using Flask for patient registration, appointment scheduling, and staff management. Designed the MySQL database schema, implemented backend logic for CRUD operations, and connected the frontend interface to live API responses.

Property Trend Analysis | [Python / Jupyter](#) | [IDS Group Project](#)

Analysed real estate datasets using Python (Pandas, Matplotlib) to identify pricing trends and regional patterns, presenting insights through visual dashboards built in Jupyter Notebook.

CERTIFICATIONS

- **AWS re/Start Program (Graduate) — Amazon Web Services**
 - Gained hands-on experience with EC2, S3, IAM, VPC, Linux, and basic networking
 - Understood cloud deployment fundamentals, monitoring, and security best practices
- NPTEL – Cloud Computing & Distributed Systems (IIT Kanpur) — Elite (82%) | 2026
- AWS Certified Cloud Practitioner — Amazon Web Services
- Oracle Cloud Infrastructure Foundations Associate — Oracle
- Data Analysis with Python — IBM

- Python for Data Science, AI & Development — IBM
- Agile Scrum Master Certification — Simplilearn
- Introduction to Software Testing — Simplilearn
