Full Stack Developer | MERN Stack | Next.js | Cloud & DevOps | Gen AI Enthusiast

PROFESSIONAL SUMMARY

Computer Science final-year student (2026 batch, Ajeenkya DY Patil University) with hands-on full-stack development experience across the MERN stack, Next.js, and TypeScript. Currently interning at DrCloud Pvt. Ltd. building React.js and Node.js features and automating cloud infrastructure on AWS. Published researcher (ICSICE-2026, Scopus/Wiley indexed). AWS re/Start Graduate and Cloud Practitioner certified. Experienced in REST API design, JWT-based authentication, MongoDB aggregation, and CI/CD workflows. Previously worked 2 years in a customer-facing corporate role, developing strong communication, CRM, and stakeholder management skills.

EDUCATION

B.Tech – Computer Science Engineering | 7.81 CGPA (up to 7th Sem) 2022 – Present
Ajeenkya DY Patil University, Pune

Higher Secondary Education (PCMB) | 90.83% 2019 – 2021
Pune, India

WORK EXPERIENCE

DrCloud Pvt. Ltd. | Cloud & DevOps Intern — Full Stack Jan 2026 – Present Remote

- **Contributed to full-stack feature development** using React.js and Node.js; built production-grade UI components and RESTful API endpoints integrated with cloud services.
- Collaborated on AWS EC2 and Terraform infrastructure; automated deployment pipelines and reduced manual release effort.
- Monitored system performance via CloudWatch; identified reliability gaps and proposed improvements impacting user experience.
- Received formal **Appreciation Letter** from DrCloud management for excellence in cloud automation, full-stack development, and cross-functional collaboration.

Concentrix Limited | Associate – Customer Service & Sales Jun 2022 – Mar 2024 Pune

- Managed 50+ daily customer queries across multiple channels; performed root-cause analysis and proposed process improvements.
- Utilised Salesforce CRM for customer data management, interaction tracking, and performance reporting.
- Created process documentation and onboarding training guides; consistently achieved monthly sales targets.

PROJECTS

SupportPulse – Customer Support Ticket Analytics System *MongoDB • Express.js • React.js • Node.js • JWT • REST APIs*

- **Full-Stack MERN Application:** Built complete ticket lifecycle management with role-based JWT authentication for Admins and Users with protected API routes.
- Implemented CRUD operations with ticket categorisation, priority management, status tracking (Open → In Progress → Resolved), and admin notes.
- Developed analytics APIs using MongoDB aggregation pipelines covering total/resolved/open tickets, high-priority trends, category statistics, and average resolution time.
- Designed filtering, search, and SLA-based workflow management; tested REST APIs with Postman; managed via GitHub branching workflow.
- **In progress:** React.js dashboard with Recharts visualisations, pagination, real-time stats, and email notifications.

Personal Portfolio Website *Next.js • React.js • TypeScript • Tailwind CSS • Vercel*

- **Deployed on Vercel:** Built a fully responsive portfolio using Next.js App Router with dark-themed glassmorphism UI, gradient glows, and smooth animations.
- Developed animated Hero section with rotating role text, responsive Navbar with smooth scrolling, mobile menu, and scroll-shrink behaviour.
- Showcased Projects, Skills, Certifications, Publications, and Contact sections with hover interactions; optimised for desktop and mobile.

- Implemented Git branching workflow with Vercel CI/CD; TypeScript throughout for type safety and maintainability.

Hospital Management System *Python • Flask • MySQL*

- Built Flask + MySQL hospital management system with patient registration, appointment management, staff tracking, and RESTful APIs; gathered stakeholder requirements and designed UX flows.

Hotel Management System *Java • Swing / AWT • JDBC*

- Developed Java-based hotel operations system with Admin Dashboard (rooms, staff, pricing) and Reception Dashboard (real-time bookings, billing).

AWS EC2 Web Server & VPC Network Architecture *AWS EC2 • CloudWatch • Terraform • VPC*

- Deployed a scalable web server on EC2; monitored via CloudWatch; designed secure VPC with public/private subnets, access controls, and architecture documentation.

TECHNICAL SKILLS

Full-Stack / Frontend: React.js, Next.js, TypeScript, Tailwind CSS, HTML, CSS

Backend & Databases: Node.js, Express.js, MongoDB (Atlas + Mongoose), MySQL, REST APIs, JWT Auth, Flask

Languages: JavaScript, TypeScript, Python, Java

Cloud & DevOps: AWS EC2, S3, IAM, VPC, Terraform, CloudWatch, Vercel, Git / GitHub

Generative AI & Tools: Prompt Engineering, AI-assisted development workflows, Postman, VS Code, Jupyter Notebook

Other Tools: Salesforce CRM, Figma / Wireframes, Power BI, Tableau, Excel

Methodologies: System Design, Agile / Scrum, REST API Design, SLA-based Workflows, Version Control

CERTIFICATIONS

- **AWS re/Start Program (Graduate) — Amazon Web Services**
 - Hands-on experience with EC2, S3, IAM, VPC, Linux, and basic networking; cloud deployment, monitoring, and security best practices.
- NPTEL – Cloud Computing & Distributed Systems (IIT Kanpur) — Elite | 82% | 2026
- AWS Certified Cloud Practitioner — Amazon Web Services
- Oracle Cloud Infrastructure Foundations Associate — Oracle
- Data Analysis with Python — IBM
- Python for Data Science, AI & Development — IBM
- Agile Scrum Master Certification — Simplilearn
- New Product Development for Small Businesses & Startups — Coursera
- Data Visualisation with Tableau — MindLusture.org
- Introduction to Software Testing — Simplilearn
- Software Engineering — Saylor Academy

INTERESTS & HOBBIES

Cricket: Active player; develops strategic thinking, teamwork under pressure, and leadership on the field.

Films & Web Series: Avid viewer with an eye for storytelling, narrative UX, and visual design — informs product and UI thinking.

Open-Source & Side Projects: Continuously building and iterating personal projects to explore new technologies and sharpen engineering skills.

Technology & AI: Following developments in Generative AI and LLMs; experimenting with prompt engineering and AI-assisted development.
